

PRODUCT LIST

1938 FORD COUPE

FRONT FLOOR SECTION

This panel begins at the bottom of the firewall and continues through to the front of the rear seat riser.

REAR FLOOR SECTION

This panel starts at the front of the rear seat riser and continues to the back panel or tool box area.

SILLS (rocker panels)

The sills/rockers panels come as a pair. LH & RH, they start at the base of the cowl and continue under the “A” pillar and finish up at the front of the inner rear wheel arch panel.

FIREWALL 5” RECESS

The recessed firewall is a full replacement unit, the old unit needs to be “unpicked” and the new unit will need to be spot-welded into place....the 5” unit is suited to big block conversions

FIREWALL 3” RECESS

The 3” unit will suit most small block conversions.

TRANSMISSION TUNNEL

(Hotrod)

The transmission tunnel is for “hot-rod” use only, and will cater for most conversions.

Note: pictures not to scale
